PROFILE

Recent business analytics graduate with experience cleaning operational data, building dashboards, and presenting practical recommendations. Comfortable moving from an ambiguous question to a structured analysis while keeping stakeholders informed.

SKILLS

Analysis: Excel, SQL, Python, pandas, Power BI | **Methods:** KPI design, data cleaning, trend analysis, requirements gathering | **Strengths:** presentation, organisation, teamwork

EXPERIENCE

Operations Analyst Intern - Cedar and Lane | Jul 2025 - Sep 2025

- Reconciled more than 4,000 order records and identified a duplicate-status issue affecting the weekly service report.
- Built a Power BI dashboard used by eight managers to monitor volume, delays, and customer-contact reasons.
- Summarised customer feedback themes and presented three process recommendations to operations leaders.

Student Ambassador - Example University | Oct 2023 - May 2025

- Coordinated campus events with a six-person team and maintained an attendance and enquiry tracker.

PROJECTS

Student Society Engagement Analysis

- Combined survey and attendance data in Python to identify scheduling and communication barriers.
- Recommended a revised event schedule that increased average attendance by 22% over the next term.

Retail Performance Case Study

- Wrote SQL queries to compare product categories and clearly documented assumptions and data limitations.

EDUCATION

BSc Business Analytics - Example University | 2022 - 2025

- Relevant study: statistics, data visualisation, operations, project management, and digital products.
