PROFILE

Entry-level software engineer with practical experience building Python services, testing data workflows, and creating accessible web interfaces. Enjoys debugging methodically, documenting decisions, and working with users to improve small internal tools.

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS | **Tools:** Git, FastAPI, Streamlit, SQLite, pytest | **Practices:** API design, automated testing, accessibility, code review

EXPERIENCE

Technology Assistant - CivicWorks Studio | Sep 2024 - Jul 2026

- Automated a weekly spreadsheet validation task in Python, reducing preparation time from two hours to 20 minutes.
- Investigated user-reported defects, reproduced issues, and wrote clear tickets with expected and actual behaviour.
- Added pytest coverage to a small data-import tool and documented the setup for new volunteers.

PROJECTS

Team Task API

- Built a FastAPI and SQLite service with validation, filtering, error handling, and automated endpoint tests.
- Used Git branches and pull requests with two classmates, resolving an API contract mismatch before integration.

Accessible Events Website

- Created a responsive JavaScript interface and improved keyboard navigation after testing with accessibility tools.

EDUCATION

BSc Computer Science - Example University | 2022 - 2025

- Relevant study: software engineering, databases, web development, algorithms, and responsible computing.
